2. The IDS filed 4/22/02 has been considered and entered.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-20 and 24, drawn to secure computer network credit transactions using biometrics, classified in class 705, subclass 35.
 - II. Claims 21-23, drawn to secure we-based credit transaction using biometrics , classified in class 705, subclass 44.

The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination II has separate utility such as establishing an account for the buyer if the credit issuing institution approves credit for the buyer, forwarding the biometric sample to a third party clearinghouse, which enrolls the biometric sample, a buyer accessing a seller's Internet site to make a charge transaction, submitting a biometric sample, and a single use credit card account number to the buyer upon successful match from the third party clearinghouse. Invention I has separate utility such as the buyer accessing a seller's Internet site to make a charge transaction, returning a result of the match to the detection server, upon the successfully match from the third party clearinghouse, obtaining a single use debit card account number from the financial institution, See MPEP § 806.05(d).
